Your demand map is a ggridded distribution raster AND you are modeling outside produced scenarios. Be sure tooo

*It looks the **BaU** scenario is missing.*

Be sure you run both scenarios: **BaU** and **ICS**, in order for the summary report in pdf to be properly built.

Remember to run **ONLY THE LAST SCRIPT** to generate alternative scenarios: *3_FW_dyn_lulcc.egoml*. Otherwise you'll start all over again.

Any doubts please email aghilardi@ciga.unam.mx

You can safely close this message.
